

## **Suggested Roles and Responsibilities for a Rapid Response Team**

The roles and responsibilities for members of the rapid response team, may include:

- ensuring emergency assistance equipment will reach the patient
- directing and coordinating activities and treatment needed when providing emergency assistance
- communicating the outcome of clinical event to the treating/relevant healthcare team, patient, family and carers as appropriate
- authorising intra- and inter-hospital transfer decisions and engaging other clinicians as required
- making treatment-limiting decisions
- documenting care.
