

## It is **safe** to visit your doctor and clinic

Keep attending your regular health checks for your chronic condition.

This will help keep you and your family strong and healthy.

If you or someone in your house is feeling sick, please visit your doctor.

### What if I can't see my usual doctor?

If your regular doctor or clinic is only doing appointments by phone and can't physically see you, you might need to call another doctor or clinic in your area.

### Does your doctor have Telehealth?

Telehealth is an appointment with your doctor by telephone or videoconference.

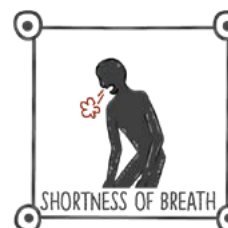

Ask if your appointments can happen by telehealth. If they can, you will be given the details you need to use Telehealth.

The following link may assist you in finding another clinic close to where you live:
